EDUCATION

SRM Institute of Science & Technology

Bachelor of Technology in Big Data Analytics - 83%

Chennai, TN, India

Jun. 2019 – May 2023

PROJECTS

PentaGo Online | React, TypeScript, Socket.io, Zustand, Framer Motion, Tailwind CSS

[Live Demo](#) | [GitHub](#)

- Built a real-time multiplayer strategy board game with React and Socket.io, supporting room-based online play and local PvP mode with shareable room links, actively managing multiple daily active users across concurrent live sessions.
- Managed complex game state including turn logic, quadrant rotation, and win detection using Zustand, with smooth UI transitions powered by Framer Motion animations, achieving sub-100ms UI response times.

Shubh Collections | React, Firebase, Tailwind CSS, Framer Motion, GSAP

[View Live](#) | [GitHub](#)

- Architected robust client-side state management for real-time Cart and Wishlist synchronization, eliminating UI latency and streamlining the checkout flow to boost user retention by an estimated 25%.
- Enhanced site discoverability and organic traffic by 35% by engineering dynamic SEO metadata injection using React Helmet and adhering strictly to WCAG accessibility standards.

macOS Portfolio | React, Zustand, GSAP, Tailwind CSS

[Live Demo](#) | [GitHub](#)

- Developed a macOS-style portfolio in React featuring a draggable Dock, multi-window system, and custom apps using Zustand for efficient state management.
- Achieved a 100/100 Lighthouse and Vercel performance score via lazy loading, dynamic imports, and UI rendering optimizations, reducing initial load time by over 40%.

EXPERIENCE

Frontend Developer Intern

Apr. 2026 – Present

Kiwis & Brownies

- Developing and deploying high-performance websites utilizing Vue.js and the proprietary KAB Page in-house editor, accelerating average page load times by over 40%.
- Optimizing front-end components for accessibility, technical SEO, and mobile responsiveness, achieving a 100% Lighthouse score for Core Web Vitals and boosting organic traffic visibility by 35%.

Frontend Developer Intern

Feb. 2026 – Mar. 2026

Amdox Technologies

- Engineered dynamic and responsive user interfaces utilizing React, focusing on component reusability and efficient DOM manipulation.
- Implemented targeted web performance optimization techniques and SEO best practices to enhance page load speeds and organic search discoverability.

Freelance Technical Media Producer

Nov. 2022 – Present

SpeedX Productions

- Engineered end-to-end post-production for technical digital media, using DaVinci Resolve, delivering engaging visual content for diverse clients.

Operational & Business Analytics Roles

Jun. 2023 – Mar. 2024

Webhelp / Skillish

- Supported strategic decision-making through data-driven insights and process optimization in service operations and business development contexts.

TECHNICAL SKILLS

Frontend: React.js, Vue.js, Redux, Redux Toolkit, Zustand, Tailwind CSS, GSAP

Languages: JavaScript, TypeScript, HTML5, CSS3, Python, SQL

Tools: Git, GitHub, Axios, Jest, Vite, npm

Other: REST APIs, Responsive Web Design, Web Performance Optimization, Lighthouse Audits, Figma
